The F783 control head is an Automated Valve Interface Device (AVID) with integrated sensors and solenoid valve with a single connection to the PLC system. For DIGITAL (hard-wired) and BUS control interfaces.

**GENERAL APPLICATIONS**
- Dairies
- Breweries
- Wineries
- Canneries
- Food processing
- Pharmaceuticals
- Chemical
- Beverages
- Other industries

**TECHNICAL DATA**
- Control voltage: 24V dc, 24V ac, 110V ac
- Operating temp.: -10°C to +50°C (14°F to 122°F) (Non condensing)
- Air pressure: 150 to 700kPa
- Position sensor: various
- \( C_v \): 0.2
- Approvals:
  - ATEX [Via. Notified Body]: II 3G Ex nA II T4 II 3D Ex tD A22 IP65 T85°C
  - IECEx: Ex tD A22 IP65 T90°C 0°C to +50°C (32°F to 122°F) [Cert. No. IEC Ex ITA 11.0016X]

**FEATURES**
- 24V dc/ac, 110V ac or BUS specific voltages.
- World recognized BUS protocols.
- PENTAIR technology.
- Modular design.
- Single 5/2 solenoid valve (as standard).
- Bi-directional speed controls.
- Lockable manual override.
- Plug in control module, switches and solenoid.
- Linear and rotary configuration.
- Fully adjustable.
- Corrosion resistant materials.
- Robust IP65/67 enclosure.
- Enclosure safety vent.
- High visibility valve status LED indicators (side mounted).
- Optional HI-VIZ position LED indicator (top mounted; retrofitable).
- Hazardous area certification to Zone 22
- Optional Intrinsically Safe (IS) component option (non-certified assembly).
- Semi-conductive Nylon enclosure for Ex versions.
- Cable entry options PG7, PG9, M16, M20 [others on request].
- Low power consumption.
- Built-in short circuit protection.

### NOTES

- Control heads can be supplied in a number of different configurations, i.e. with or without solenoid or module and single or dual switching. Different types and makes of switches can also be fitted on request, i.e. proximity (std), reed or microswitch, etc. The maximum temperature rating of the control head is limited by the solenoid, which is rated at 50°C (122°F).
- PENTAIR actuators are factory lubricated and do not need lubricated air. The use of synthetic oils and some mineral oils are known to be damaging to polymer components. PENTAIR therefore recommends that clean dry air be used.

4. Connection to certified intrinsically safe circuits with the max. values U = 15 V / I = 50 mA / P = 120 mW

While the internal electrical components offered with this arrangement are all certified as Intrinsically Safe on a standalone basis, and the enclosure is made from a high grade anti-static semi conductive material. The complete assembly with these parts has not been assessed or certified as Intrinsically Safe. Therefore it is the end users responsibility to assess and accept this assembly as suitable for their individual application.

5. For EExI units the solenoid valve arrangement is a combination of the standard SYJ5153 valve with the coil replaced with a separately approved intrinsically safe 302 pilot valve/coil.

6. Coil designed for continuous duty within the maximum ambient temperature limits. The solenoid valve must be connected to a specific, approved power supply (safety barrier or interface) located in a safe area.
The F783/E Digital 24V AC/DC control module is for use in the F783 Easymind control head and is connected via hard-wired I/O directly to a PLC. This single module can be used for AC and DC (PNP/NPN) type of applications.

**FEATURES**

- Hard-wired I/O control system.
- Compatible with most common PLC’s.
- Easy fit, with simple clip retainers.
- Single module for AC and DC applications.
- 2 limit switch/sensor inputs.
- 1 solenoid valve output.
- Plug-in switches and solenoid valves.
- Fully adjustable limit switches.
- Electronics conformal coated.
- Low power consumption, under 80mA in normal operational mode (solenoid valve energized, 1 input sensor on).
- Built-in short circuit protection to 250mA on any output.
- External LED indication of valve position and solenoid valve status.
- Customers preference for field connections.
  - Flying lead with connector.
  - Bulkhead fitted socket.
  - Open wiring system using cable gland (standard).

**APPLICATION AREA**

This device has been designed for use in any industry where hard-wired Digital control is desired, such as the food, beverage and pharmaceutical industries.

**I/O CONNECTIONS**

**Note**
Also see ‘Wiring and connectors’ paragraph

**Hard-wired inputs**
Input 1: Closed position sensor, red LED indication at front of module (3 wire connection)
Input 2: Open position sensor, green LED indication at front of module (3 wire connection)

**Hard-wired output**
Output 1: Main solenoid valve, amber LED indication at front of module (2 wire connection)

**LED INDICATORS**

Red (left): valve position indication
Indicates closed limit switch active (input 1).

Green (centre): valve position indication
Indicates open limit switch active (input 2).

Amber (right): solenoid valve
Indicates solenoid valve energized (output 1).

<td></td>
<td>Solenoid valve [polarity NOT critical]</td>
<td></td>
</tr>
</tbody>
</table>

**NOTE**

If 5 core wire control is required, the negative (-) terminal of the solenoid valve may be connected via a suitable jumper, to the matching polarity terminal at 1 or 2 respectively.
PENTAIR
F783 EASYMIND CONTROL HEAD AS-INTERFACE MODULE

The F783/E AS-Interface control module is for use in the F783 Easymind control head and is connected via an AS-Interface master to a PLC.

FEATURES

- Fully AS-Interface version 3.0 compatible A/B slave device (max. 62 slaves).
- Easy fit, with simple clip retainers.
- 2 limit switch/sensor inputs.
- 3 solenoid valve outputs.
- Plug-in switches and solenoid valves.
- Fully adjustable limit switches.
- Electronics conformal coated.
- Low power consumption, under 70mA in normal operational mode (main solenoid valve energized, 1 input sensor active).
- BUS powered or external power option (selectable with jumper wires on module connector).
- Built-in short circuit protection to 200mA on any output.
- External LED indication of valve position, solenoid valve status and fault status.
- Customers preference for field connections.
  - Flying lead with connector.
  - Bulkhead fitted socket.
  - Open wiring system using standard cable gland

AS-INTERFACE 2 IN/3 OUT BIT-MAPPING

AS-Interface inputs
IØ (input Ø)* Closed limit switch
I1 (input 1)* Open limit switch

AS-Interface outputs
OØ (output Ø)* Main solenoid valve
O1 (output 1)* Auxiliary output 1
O2 (output 2)* Auxiliary output 2

(* Refers to the physical I/O labeling as referenced on the picture adjacent.

APPLICATION AREA
This device has been designed for use in any industry where simple BUS network control is desired, such as the food, beverage and pharmaceutical industries.

LED INDICATORS

Red (left): valve position indication
Indicates closed limit switch active (input Ø; IØ)*

Green (centre): valve position indication
Indicates open limit switch active (input 1; I1)*

Amber (right): main solenoid valve
Indicates main solenoid energized (output Ø; OØ) *

Amber small: optional solenoid valve
Indicates [output 1; O1]* is energized

Amber small: optional solenoid valve
Indicates [output 2; O2]* is energized

Red small: FID indication [On top of module, unlabeled]
This red indicator is active if the module does not have auxiliary power connected (for example the jumpers are not installed) or if the address is = Ø

(* Refers to the physical I/O labeling as referenced on the picture adjacent.)

### WIRING AND CONNECTORS

To power the module from the BUS, ensure jumper wires are installed from terminals 1 to 3, and 2 to 4.

**NB:** Jumpers are supplied and fitted as std. on all new control head assemblies.

To power the device from an auxiliary supply, remove the jumper from terminal 1 to 3 and connect 24V DC positive to terminal 3. Connect the supply negative to terminal 4, leaving the jumper from terminal 2 to 4 in place. Do not connect anything to terminal 1.

The 6-pin PHOENIX plug on the module is connected as follows:

<table>
<thead>
<tr>
<th>Terminal</th>
<th>AS-Interface</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Internal 30 V DC +ve (out)</td>
</tr>
<tr>
<td>2</td>

</tr>
<tr>
<td>6</td>
<td>BUS –ve (blue)</td>
</tr>
</tbody>
</table>
The F783/E AS-Interface control module is for use in the F783 Easymind control head and is connected via an AS-Interface master to a PLC.

**FEATURES**

- Fully DeviceNet compatible group two slave device.
- Easy fit, with simple clip retainers.
- 2 limit switch/sensor inputs.
- 3 solenoid valve outputs.
- Plug-in switches and solenoid valves.
- Fully adjustable limit switches.
- Electronics conformal coated.
- Low power consumption, under 70 mA in normal operational mode (main solenoid valve energized, 1 input sensor active).
- Voltage booster for the input sensors and the outputs to 22 volts minimum.
- Internal open/closed limit fault timers.
- Reverse action option.
- Analogue and pulse counter input options.
- PENTAIR seal kit, valve and actuator assembly part numbers stored on-board the device. These can be re-defined by the user if required.
- User-configured maintenance data stored on-board the device.
- Users own part numbers for service components.
- User defined service flag.
- Proven CAN communication technology.
- Supports Change-of-State (COS) and polled messaging.
- Built-in short circuit protection to I(max) = 500mA (internal).
- External LED indication of valve position, solenoid valve, BUS and module status.
- Customers preference for field connections.
  - Flying lead with mini or micro connector.
  - Bulkhead fitted socket.
  - Open wiring system using standard cable gland.
- Permanent record on EEPROM of:
  - Total number of operations since manufacture.
  - Dates of last actuator and valve service.
  - Number of valve operations since last service.
  - Last open and close cycle times.
  - Average time of last 8 cycles.

**LED INDICATORS**

- **Red (left):** valve position indication
  Indicates closed limit switch active (input 1).
- **Green (centre):** valve position indication
  Indicates open limit switch active (input 2).
- **Bicolor amber/red (right):** BUS/module status.
  Indicates BUS status and main solenoid valve active (output 1).

**DEVICE INPUT MAP**

| Bit Ø | Closed limit switch ON |
| Bit 1 | Open limit switch ON   |
| Bit 2 | Service flag set       |
| Bit 3 | Double indication      |
| Bit 4 | Failed to open (within set time) |
| Bit 5 | Failed to close (within set time) |
| Bit 6 | Low voltage            |
| Bit 7 | Module failed          |

**DEVICE OUTPUT MAP**

The 8 bit output byte maps the following network commands to the device:

- Bit Ø: Energize output 1
- Bit 1: Energize output 2
- Bit 2: Energize output 3
- Bit 3: Initiate ESD function
- Bit 4: Reset failed to open flag
- Bit 5: Reset failed to close flag
- Bit 6: Reset low voltage flag
- Bit 7: Reset module failed flag

**APPLICATION AREA**

This device has been designed for use in any industry where a comprehensive BUS network control solution is desired, such as the food, beverage and pharmaceutical industries.

**NOTES**

Only output 1 is controlled by the ESD (Emergency Shut Down) command, the other 2 outputs remain as set in the program. The service flag is reset by writing a new service count value to parameter 13 either with a manager program, or via the PLC.

**DEVICENET CONFIGURATION**

- **Device type**: group 2 slave device

  **NOTE:** For full details on module configuration see separate full DeviceNet feature list

**WIRING AND CONNECTORS**

The standard F783/E control head with its pig-tail cable gland will take the DeviceNet drop-line cable, allowing for quick and economical conversion from a hard-wired control system to a DeviceNet network.

Other field connection options available on request, of which std. options are shown at the bottom of the ‘features’ section above.

The 6-pin PHOENIX plug on the module is connected as follows:

**NOTE:**

This device requires a matching EDS (Electronic Data Sheet) to allow the network to recognise the device when connected.

The latest version of the EDS file can be obtained from our web site F783 Easymind downloads or any earlier versions from the factory, please contact your sales representative for further details.
The F783/E Digital 110V AC control module is for use in the F783 Easymind control head and is connected by hard-wired I/O directly to a PLC.

FEATURES

- Hard-wired I/O control system.
- Compatible with most common PLC’s.
- Easy fit, with simple clip retainers.
- 2 limit switch/sensor inputs.
- 1 solenoid valve output.
- Plug-in switches and solenoid valves.
- Fully adjustable limit switches.
- Electronics conformal coated.
- High visibility solenoid valve and valve status LED indicators.
- Low power consumption, under 25mA in normal operational mode (solenoid energized, 1 input sensor on).
- External LED indication of valve position and solenoid valve status.
- Customers preference for field connections.
  - Flying lead with connector.
  - Bulkhead fitted socket.
  - Open wiring system using standard cable gland.

APPLICATION AREA

This device has been designed for use in any industry where hard-wired Digital control is desired, such as the food, beverage and pharmaceutical industries.

HARD WIRED OUTPUTS

I/O connections

Note
Also see ‘Wiring and connectors’ paragraph

Hard-wired inputs
Input 1: Closed position sensor, red LED indication at front of module [2 wire device 3 wire connection]
Input 2: Open position sensor, green LED indication at front of module [2 wire device 3 wire connection]

Hard-wired output
Output 1: Main solenoid valve, amber LED indication at front of module [2 wire connection]

LED INDICATORS

Red (left): valve position indication
Indicates closed limit switch active (input 1).

Green (centre): valve position indication
Indicates open limit switch active (input 2).

Amber (right): solenoid valve
Indicates solenoid valve energized (output 1).

ENCLOSURE ENVIRONMENT SPECIFICATIONS

Operating temperature: -10°C to +50°C (14°F to 122°F) (non condensing)
Storage temperature: -10°C to +50°C (14°F to 122°F) (non condensing)
Protection class: See housing specifications

WIRING AND CONNECTORS

The 6-pin PHOENIX plug on the module is connected as

<table>
<thead>
<tr>
<th>Terminal</th>
<th>Digital 110 V AC</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Supply [P]</td>
</tr>
<tr>
<td>2</td>

SELECTION GUIDE

Example: F783E 24 DC P M 15A 2PK CGB M HV

<table>
<thead>
<tr>
<th>Figure number</th>
<th>F783E</th>
</tr>
</thead>
</table>

Module voltage/Module interface
- 24: 24V (Std.)
- 110: 110V
- AS-I: AS-Interface
- D-NET: DeviceNet
- EExI: Intrinsically safe components

Voltage type: (specify for 24V and 110V only, otherwise leave blank)
- DC: DC (Std.)
- AC: AC

Junction type: (only relevant to DC rated heads, otherwise leave blank)
- P: PNP (Std.)
- N: NPN

Interface connection
- M: Module included (Std.)
- T: Terminal block included
- -: If blank space filler used, module is not included

Number and type of solenoids: (e.g. 1SA = 1 x 5/2 solenoid)
- 1SA: 1 x 5/2 solenoid (Std.)
- 0SX: No Solenoid but blanking plate fitted
- --: If blank space filler used, no blanking plate fitted

Number and type of sensors: (e.g. 2M = 2 micro switches)
- PK: Proximity switch PENTAIR (Std.)
- A: Air switch
- M: Micro switch
- PI: Proximity switch IFM
- R: Reed switch
- PS: 11 mm Barrel proximity switch c/w 3M cables and SS body

Electrical connection: Primary
- CG: Cable gland supplied, specify type with one of the following letters
  - A: PG7
  - B: PG9 (Std.)
  - C: PG16
  - D: M16
  - E: M20
  - F: M25
  - G: PG16 c/w cable insert
  - H: M20 c/w cable insert
- AMP: Amphenol plug
- BH4: 4 Pin M12 bulkhead
- BH5: 5 Pin M12 bulkhead
- BHV: 4 Pin M12 bulkhead c/w Vampire
- M20: Tapped to M20 thread only (no gland supplied) NB: All IEC Ex heads supplied without gland

Air connection style
- M: Metric tubing 6mm (Std.)
- I: Inch tubing ¼"
- X: Air ports blanked

Accessories or extender definer
- HV: High Visibility 360° LED Indication unit (Option)
- ExII22: IEC Ex certified to Zone 22
- ExII32: ATEX to Zone 22 (Notified Body Assessment Certification)
- ExII3D: ATEX to Zone 22 (Enclosure based Certification)
- TR: Tropicalised to reduce condensation effect

NOTE: *
* Connector types dependant on interface selected, custom options available upon request.
** Not all options are available on IEC version, consult factory/customer service for guidance.
