Pentair Südmo’s hygienic shut-off Butterfly Valves are used across the process industries including brewing, beverage, pharmaceutical, chemical, cosmetic, and food. Pentair Südmo’s comprehensive valve line features both manual and pneumatic drive options, including lockable handles and vertical actuators. The butterfly valve range is available in sizes ranging from ½ to 6 inch OD Tube, Schedule 5, metric, and ISO pipe dimensions, and offers a wide variety of connection types including butt weld, tri-clamp and small-flange. The special seal design, with an expansion groove, minimizes wear and ensures long service life. Various FDA compliant seal options are available. No special tools are required to change the seals, making the valve quick and easy to maintain. A variety of options, including our state-of-the-art IntelliTop®, allow monitoring and control of the valves through the control system. Existing Butterfly Valves can easily be retrofitted with the IntelliTop 2.0.

PRODUCT INFORMATION

- **Butterfly valve discs**
  - Solid butterfly disc, 316 L stainless steel material (1.4404)
  - Highly resistant to aggressive media
  - Slide bearing between valve disc shaft and housing flange provides lower switching friction and optimum centering

- **Butterfly valve seals**
  - Special seal geometry guarantees long service life
  - The seal is marked for easy identification of size and material
  - All seal materials are FDA-compliant

- **Butterfly valve housing**
  - Many different connection types available
  - Housing marked for easy identification of material, size and pressure rating
  - Optional housing with acceptance test certificate to DIN EN ISO 10204 – 3.1 (WAZ) available

Butterfly valves with pneumatic actuator (top) and stainless steel handle (bottom)

HYGIENIC SHUT-OFF VALVES

PRODUCT LEAFLET

TECHNICAL DATA

MATERIAL
Product contact
1.4404 (AISI 316L)
Non-product contact
1.4307 (AISI 304 L)

Seals
Standard: EPDM
Optional:
HNBR
VMQ
FPM
PTFE
All seals FDA-compliant.
Other seal materials on request.

OPERATING TEMPERATURES
for EPDM seals
130 °C (266 °F) continuous
150 °C (300 °F) short sterilization

PRESSURES
Control air pressure
Standard 6 bar (87 psi) – 8 bar (116 psi)
Operating pressure
Standard 10 bar (145 psi)

FINISH
Product contact
Ra ≤ 0.8 µm
Non-product contact
Ra ≤ 1.6 µm
Optional
Improved mechanical polish/electropolish

CONNECTIONS
Pipe dimensions to
- DIN 11850 Series 2 (DIN 11866 Series A)
- ASTM A270 (ASME BPE-2009 / DIN 11866 Series C)
- DIN EN ISO 1127 (DIN 11866 Series B)

AVAILABLE CONNECTIONS
- Threaded ends/conical couplings with locknut (DIN 11851/DIN 11864-1 IDF/RJT/SMS)
- Tube butt weld
- Small flange
- Tri-clamp [DIN 32676/ DIN 11864-3]

ACTUATOR OPTIONS
- Standard handle
- Lock-out handle with mechanical stop
- Actuator
  - Air to open, spring to close
  - Spring to open, air to close
  - Air to open, air to close
